

Capstone Project – A Restaurant Guide for Dubai (Week 1)

Introduction

Dubai is one of the best tourist destinations around the world, best known for its shopping spots as well as for its magnificent attractions. Its main goal and development towards tourism started back in 2013 when the emirate decided to bring in cash flow from outside the country. Considering this it wouldn't be a surprise if the food industry didn't boom as well as of course when tourists enter the country to visit various sites an appetite would be showing itself. For this very reason the restaurants and its various cuisines are being taken into account for and to finally provide with a short guide of the various restaurants based on cuisine or the surrounding area and its minor attractions. This would definitely be of use to tourists and even new residents who are unaware of what is in this huge city.

Business Problem

This project aims to provide with details regarding to what cuisines are available and their locations. A further analysis can be done to give the number of restaurants per area or cuisine or grouping based on both. It also provides with an analysis of the surrounding available ventures for each or any preferred restaurant.
